

## SafeLine appoints Stuart Garcia to Group Management Team

Stockholm/Manchester/London, 2 February 2026

SafeLine Group has appointed Stuart Garcia, CEO of SafeLine Group UK, to its Group Management Team. The appointment strengthens the Group's leadership capacity as SafeLine continues to expand internationally and develop its offer within lift safety and emergency communication.

Stuart joined SafeLine in 2018 to establish the company's UK operation. Since then, he has led the development of the business, building local capability across commercial, operational and customer-facing functions. In his new role, Stuart will contribute to Group-level priorities including international growth, customer experience and operational development across markets.

With a background spanning the UK, Ireland and Australia, Stuart has held roles across engineering, operations and senior management. His career progression from apprenticeship to executive leadership has given him a broad perspective on the lift industry and the requirements of delivering reliable safety and communication solutions at scale.

"Being appointed to the SafeLine Group Management Team is an important step for me and a responsibility I take seriously," says Stuart Garcia. "SafeLine has a clear purpose and a strong platform for continued international development. I look forward to working with colleagues across the Group to support growth, invest in our people and keep improving how we deliver safety and support to customers."
